Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS I actually stuck with it for a whole month! I should invite my friends to join me."	THINKS • suggestions for the very haptic feedback so users don't have to constantly look at their screen while exercising.
PERSONA NAME (Role / User Type)	
DOES • I hope this app actually keeps me accountable and isn't too complicated to navigate." "Am I even doing these exercises correctly? I don't want to accidentally injure myself."	FEELS • Downloads various health and fitness apps but rarely opens them after the onboarding process. - Spends 8+ hours a day sitting at a desk, leading to stiffness and low energy.
