

Project Initialization and Planning Phase

Date	30 SEPTEMBER 2026
Team ID	SWTID-2026-4644
Project Title	FIT BUDDY
Maximum Marks	5 Marks

Project Proposal (Proposed Solution) report

The proposal report aims to transform loan approval using machine learning, boosting efficiency and accuracy. It tackles system inefficiencies, promising better operations, reduced risks, and happier customers. Key features include a machine learning-based credit model and real-time decision-making.

Project Overview	
Objective	The primary objective is to revolutionize the Fitnesss process by implementing advanced machine learning techniques, ensuring faster and more accurate energy
Scope	The project comprehensively assesses and enhances the loan approval process, incorporating machine learning for a more robust and efficient system.
Problem Statement	
Description	Addressing inaccuracies and inefficiencies in the current fitness After giving you Patrice task
Impact	Solving these issues will result in improved workout consistency, reduced risk of overtraining, and an overall enhancement in the fitness experience, contributing to personal well-being and application succ
Proposed Solution	
Approach	Employing machine learning techniques to analyze user metrics and predict optimal training loads, creating a dynamic, full-stack fitness application.
Key Features	Implementation of a machine learning-based personalized workout and diet model. - Real-time performance tracking with secure cloud database integration.

	- Real-time decision-making for quicker loan approvals. - Continuous learning to adapt to evolving financial landscapes.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	T4 GPU
Memory	RAM specifications	8 GB
Storage	Disk space for data, models, and logs	1 TB SSD , MongoDB Atlas
Software		
Frameworks	Python frameworks	Flask
Libraries	Additional libraries	scikit-learn, pandas, numpy, matplotlib, seaborn
Development Environment	IDE and workspace	Cursor, Replit, Google AI Studio
Data		
Data	Source, size, format	Kaggle Gym Exercise Dataset, 15MB, CSV; UCI Human Activity Recognition Dataset, 7352 records, CSV
